*Product Application Guide*  
*Café WiFi HotSpot Billing*

## Introduction

The future trends of ubiquitous WiFi, the skyrocketing rise in the number of wireless-enabled devices in use, 80% of the time, people want to get WiFi and run wireless Internet on their laptop, tablet pc or smart phone when they sit somewhere. WiFi hotspot Internet service inside the cafe or restaurant will ensure that customers stay there for a longer duration and earn more money.

## Problem Statement

Traditionally, you may put wireless access point in the cafes and other public areas. Not only your guests can connect the unsecured WiFi network but also your neighbors can share the WiFi.

Would you worry that neighbors may steal your WiFi, slow down your bandwidth and they can distribute your guests' information to any third parties? What's your another nightmare?

Waiters give new guest account laboriously every time and can't control your cafe or restaurant labor cost.

### **Cafe WiFi Solution - Easy, Secure and Lowest Labor Cost!**

**AG-300E  
Account Generator**

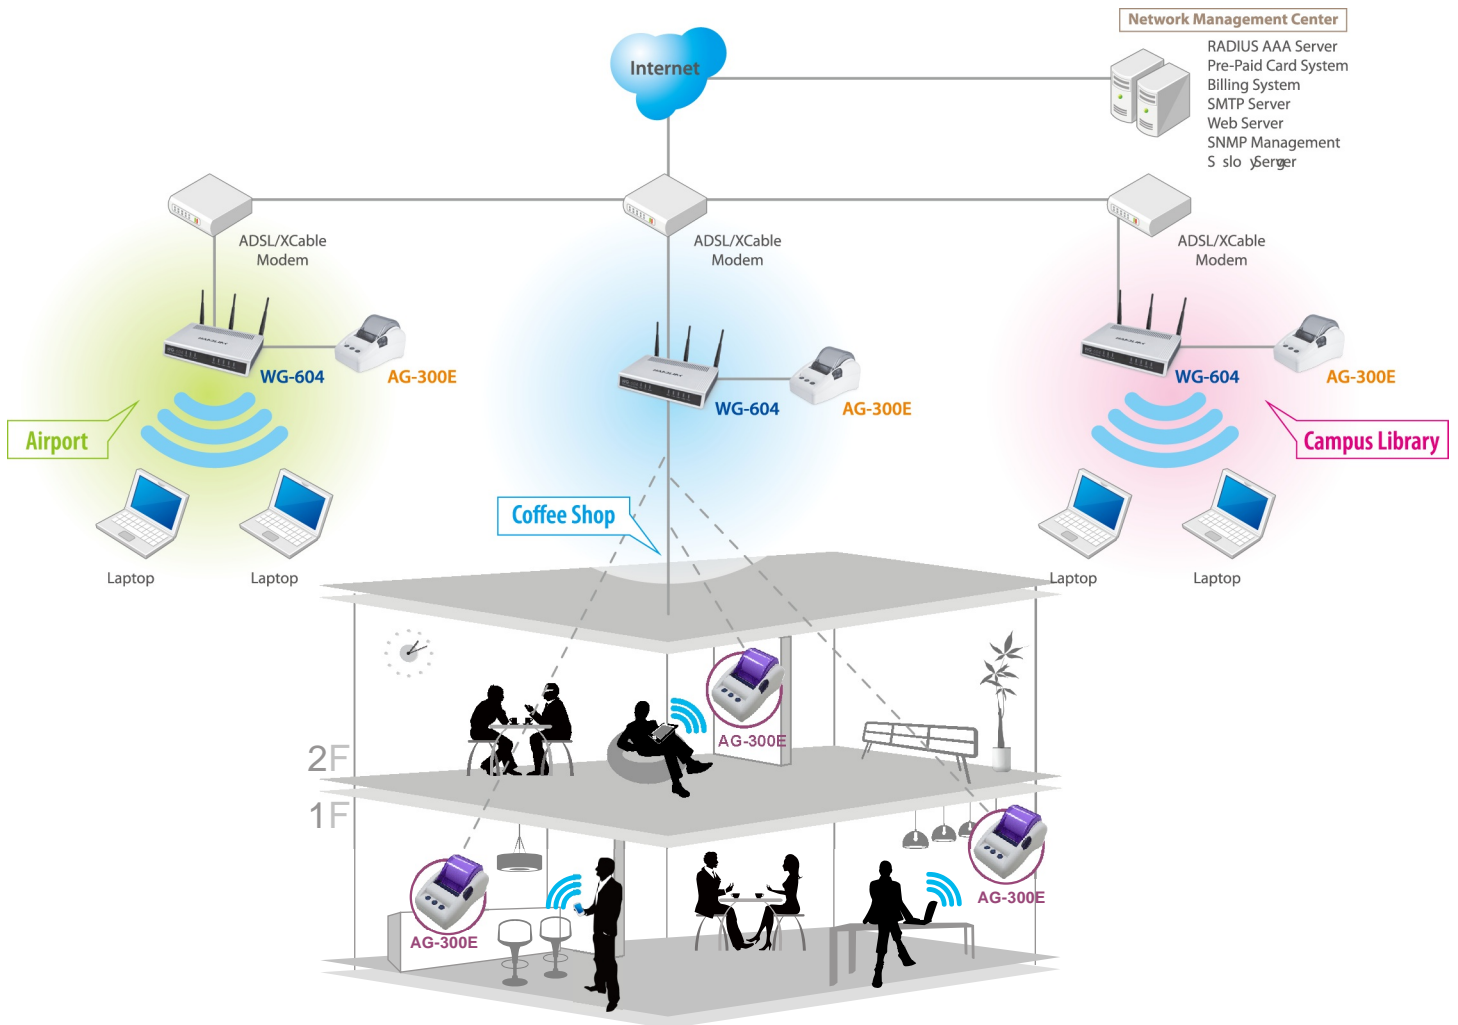

**Wireless Subscriber Gateway**

Now you have powerful method for building WiFi hotspot billing, our WG-604 Wireless Subscriber Gateway and AG-300E Account Generator Thermal Printer provides a simple hotkey to generate one WiFi account and print it out that can provide WiFi self-service, generate billing system summary and save your labor cost.
